Individual Statement of Work

Between

Macy's Systems and Technology, Inc.

And

Pyramid Consulting, Inc.

For

Omni Sales Repository (OSR / Corp. FINANCE)

January 29th 2026

This Individual Statement of Work (“ISOW”) is executed as of February 01st, 2026 (the “ISOW Effective Date”) by and between Pyramid Consulting, Inc. (“Vendor”) and Macy’s Systems and Technology, Inc. (“Customer” or “Macy’s”). This ISOW is entered into pursuant and subject to the Master Consulting Agreement entered into by and between Vendor and Macy’s and dated as of, January 29, 2017, as amended (the “Agreement”) and the Master Statement of Work (“MSOW”) entered into by and between Vendor and Macy’s dated as of January 18th, 2024. Except as expressly agreed to herein, this ISOW and the schedules, exhibits and attachments hereto, are hereby incorporated into and subject in all respects to the terms and conditions of the Agreement and MSOW. The ISOW Services (as defined below) shall be governed by, and performed in accordance with, the terms and conditions of the Agreement and MSOW, provided, however, that in the event of any conflict between the terms and conditions of this ISOW and the terms and conditions of the Agreement or MSOW, the terms and conditions of the Agreement and MSOW shall prevail over this ISOW except for the items called out in Section 4 Special Considerations.

1. **Project Name:** Omni Sales Repository (OSR)

2. **Project Code (PRJ) -** PRJ – 24001

Background Overview and Skillset requirements

The Omni Sales Repository project will address the followings:

- OSR is single source of truth for audited data.
- Work in microservices architecture.
- Will be responsible for adding new features, modify existing features.
- Be able to work with Java 17, Springboot, GCP services such as Pubsub, Kubernetes, Cloud storage, ArgoCD, Deploying CI/CD pipelines.
- Experience with postman for testing APIs.
- Team will be getting data from upstream systems, need to transform data according to requirements which helps in journaling, sending data to downstream system in the format which the legacy systems sends currently.
- Mapping of all the fields required for the legacy system to work.
